DETAILED ACTION

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

2. In response to this communication regarding Election/Restriction requirement, the applicant is required to elect one patentably distinct species from the following list.

Species A: (claims 1,2 and 4) is directed to a method for the formation of dynamic alliances between vendors with complimentary capabilities to jointly pursue specific market opportunities. This species generates a plurality of sets of vendors which meet demanded capabilities derived from a request for proposal (RFP), selects one or coalition alternatives from the plurality of sets and selects a preferred coalition from the coalition alternatives to responds to the RFP.

Species B: (claim 3) is directed to a coalition formation method for dynamic alliance between multiple vendors in a market place. This species generates a shortlist of potential vendors based upon capabilities required for an RFP of a customer and vendor capabilities stored in a database, invites vendors on the shortlist, each invited vendor assesses the RFP requirements, decomposes the RFP into a plurality of sub-request for proposals wherein the invited vendor becomes a customer submitting the sub-request for the proposals. The species then, forms a coalition of vendors who responds to the sub-request for the proposals.

Species C: (claims 5-8) is directed to system of coalition structure formed through cascading requests for proposals across multiple tiers of vendors. Note that the system does not require that an RFP be submitted by a customer and that the coalition structure is formed based

Art Unit: 3624

upon demanded capabilities are independent of specific customer submitted RFP. This species is usable to develop a coalition structure in anticipation of an RFP.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

5. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

6. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

7. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the

Art Unit: 3624

examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
